## 🧠 Profile

I'm a **Web Developer** specializing in front end development. Experienced with all stages of the development cycle for dynamic web projects. Well-versed in numerous programming languages including **HTML5, Java OOP, JavaScript, CSS, Nodejs**.

### As Freelancer and Virtual Assistant

I have been doing freelance projects as virtual assistance and doing a data science job with few international companies as remote I'm a Computer Scientist and have been working for different international companies like **ekomi, Allianz Group of companies and Outsource4work (Remotely)**. I did Research and Digital marketing including finds prospects and listing them with 100% accurate information.

As the **Business Development Manager** it is my responsibility to get the numbers rolling for the company. My job holds a crucial role of developing strategies and strategic plans to align the business goals and company objectives and lead to revenue generation. This involves deep market research and business opportunities assessment.

**Data Analyst** with 2 years of experience across diverse industries. Expertise in analysis and testing of business requirements to drive deployment of applications, business processes and system solutions. Highly analytical and detailed with documented track record in full software development life cycle (SDLC) methodologies and Agile techniques. Driven Web development well versed in team collaboration to formulate and conceptualize corporate web presence. Specialty embracing challenging projects requiring detailed coding changes, search engine-related considerations and security. Integrates knowledge of visual arts to develop functional, appealing, custom-made web products and services.
